BIOSINTEX GOWN

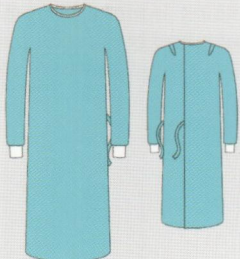

Surgical reusable gown

Description	<p>The surgical gowns are meant to prevent the infections' transfer from the surgical team to the surgical wound and vice versa. There are designed by special materials able to prevent the skin spreading into the air of the operating theatre, when being used in sites having high quality air filtration systems.</p>
Features	<p>The gowns are available in a universal size, comfortable on body contour, being adjustable due to the tie bands.</p> <p>The gowns are delivered unsterile and required washing and sterilisation before being used. The Biosintex gowns are designed for 50 sterilisations.</p> <p>The main characteristics of the surgical gowns are:</p> <ul style="list-style-type: none">- liquid penetration resistant- high tearing resistance- no lints- no electrification
